

**NMP-001**

**Extra 12v 17amp Battery**

Rechargeable Sealed Lead-Acid Battery is maintenance free, spill proof using leak proof battery construction

**DC/DC Power Adapter**

DC adapter matched to your hardware's needs.

**12v 17amp Battery**

Rechargeable Sealed Lead-Acid Battery is maintenance free, spill proof using leak proof battery construction

**Status Indicator**

Easy to see visual alert with 7 segments that indicate remaining battery capacity.

**6amp Charger**

Smart Charger

- **DC Power Design** - Allows maximum computer runtime
- **Computer runtime** - 8-24 hours (depending on technology configuration, application, battery age, usage pattern)
- **Battery Type** - 12v 17amp Sealed lead acid that is maintenance free, spill proof using leak proof battery construction
- **Charger Capacity** - 6amp smart charger
- **Input Voltage** - Nominal 120vac, 50/60 Hz
- **Output Voltage** - 12v 6amp DC
- **Charge Time** - Up to 3 hours for standard 12v 17 amp battery
- **Status Indicator** - LED lights signal when charging is needed
- **Approvals** - All components are UL listed and recognized

**FRS - NMP - 001**

Our one-of-a-kind FRS Power Option implements a direct DC to DC connection omitting the need to invert the energy from the battery. This allows for more efficient use of the power at hand. This is also a much safer way to transition power from our battery to your computer by eliminating high voltages and heat emissions sometimes associated with AC inverters.

Note: The NMP-001 can only be used with the FRS Series Carts

Runtime unmatched by others in the industry.
