

# X2-DC

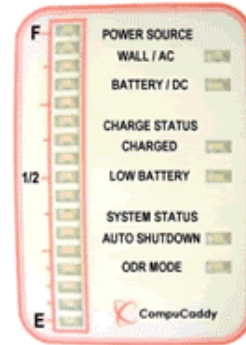

## Mobile Power

X2-OPT-L and X2-OPT-PC

### battery meter display

Allows user to monitor battery status in real time on the monitor.  
OS - Windows 2000, 2003, XP and Vista

### overlay

Allows user to monitor battery status in real time.

### power adapters

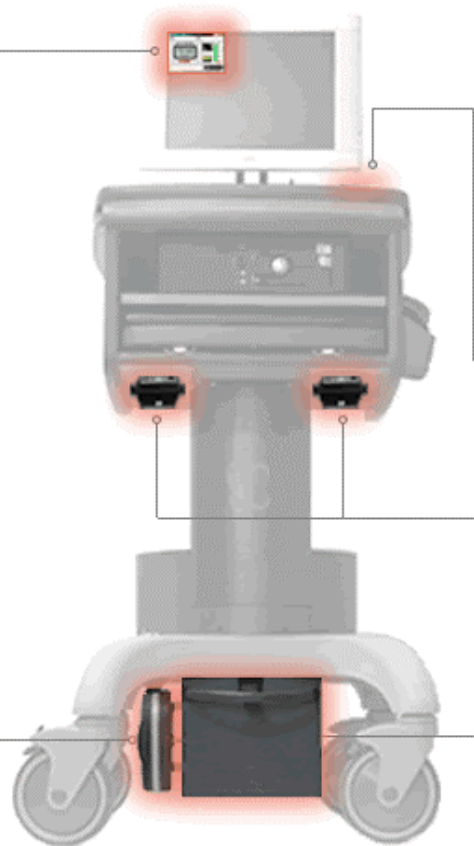

Adapter matched to your hardware needs. Depending on your hardware configuration you will have one or two adapters.  
X2-OPT-L requires 1 adapter  
X2-OPT-PC requires 2 adapters

### retractable cord

Hospital grade retractable cord.  
Cord Length: 10'

### CC Power

Batteries created with non-recycled lead and an industry specific charger designed for mobile applications.

## X2-OPT-L and X2-OPT-PC

Our one-of-a-kind X2 Power Option implements a direct DC to DC connection omitting the need to invert the energy from the battery. This allows for more efficient use of the power at hand when transitioning power from our battery to your computer.

Note: The X2 power options can only be used with the X2 Series Carts

Runtime unmatched by others in the industry.

- **DC Power Design** - Allows maximum computer runtime
- **Computer runtime** - 8-24 hours (depending on technology configuration, application, battery age, usage pattern)
- **Battery Type** - 12v 35amp Sealed lead acid that is maintenance free, spill proof using leak proof battery construction
- **Charger Capacity** - 10amp smart charger
- **Input Voltage** - Nominal 120vac, 50/60 Hz
- **Output Voltage** - Shared 150 watt 12v 10amp DC
- **Charge Time** - Up to 5 hours for standard 12v 35 amp battery
- **Overlay** - LED lights signal when charging is needed
- **Approvals** - All components are UL listed and recognized
