For Immediate Release:

CompuCaddy Announces New Design and Enhanced Features

An innovator in the mobile computer cart industry since 1987, CompuCaddy has redesigned their product line up. New features include a sleek modern look with European grey molded finish, 6-inch rubber tread wheels, and the new CC Power System, engineered to provide the longest continuous battery runtime in the industry. The new line up is ready to handle any mobile computer configuration: laptop, flat panel/PC, or a hybrid version — laptop with flat panel screen.

CompuCaddy's reputation for one of the largest work surfaces continues with a 20 x 24 inch top. Additional space is available with a slide through work surface, mouse tray and optional basket.

CompuCaddy is a leader in the mobile computer cart industry, supplying the healthcare, business, and industrial markets' need for well-built, well-designed products.
